Summary

Junior Full Stack Web Developer with a strong passion for creating responsive, clean user-friendly web applications, problem-solving and learning new technologies.

Languages/Frameworks

HTML • CSS • Javascript • React

Node.js • Express • MongoDB • Material UI • RESTful API

Tools

Git • Visual Studio Code

Personal Projects

Full stack employee scheduler application. The user can add and edit employees/shifts and view weekly schedule in printable format. All changes occur in real-time and queries/saves to a database using a custom-built REST API. Developed using React, Express, Node.js, MongoDB and various other libraries.

Front end audio player application. The user can load an audio file and set A & B loop points as well as slow down the tempo. Useful for musicians who need to isolate a certain section of a song for playing-along and practicing purposes. Developed using React and Material UI for the front end and the Tone.js library for playback functionality.

Education

University of Wisconsin, Madison - Full Stack Web Development - 2020
